What is GraceHacks?

GraceHacks is a 24 hour hackathon for female and non-binary students and includes a day full of hacking, learning and using new technologies.

The aim of GraceHacks is to foster a welcoming and supportive hackathon environment for womxn and non-binary students. GraceHacks strives to empower these underrepresented groups and ensure that they have the confidence to create without inherent bias or sexism and to encourage their passion to excel in STEM fields.

GraceHacks held its first hackathon virtually in October 2020 with over 100 attendees. This year, GraceHacks will be held in November 2021 both virtually and in person (COVID-19 permitting) at University of California, Santa Cruz.

Why sponsor GraceHacks?

Supporting womxn in STEM: Be featured on our social media as a promoter of diversity in STEM fields and a supporter of womxn in STEM.

Branding: Advertise your company as a promoter of diversity in technological fields by being featured on our social media and attendee swag.

Recruiting: Acquire access to attendee contacts to use as a segway into recruiting talented and diverse individuals into your company.

Mentorship: Send mentors to our hackathon to recruit students for your company.

Product exposure: Advertise your product at our hackathon to spread word about your company and its technologies.
